Web developer pivoting from an agency working on primarily CMS driven sites to a more challenging web applications career. Taking lead on projects I've refined my skills by being involved with both the tech team and the client. My duties have involved the entire project lifecycle: pitch meetings, defining project scope, rapid prototyping, frontend architecture design, technical effort estimations, initial development, site launch, and client support, code maintenance, as well as dev environment improvements. I am often brought in by other teams as a resource for motion-based interactions due to my background in videography and interest in CSS/JS animations. Outside of work I am active in the coding community attending: hackathons, javascript meetups, and art/tech conferences like the Kikk Festival in Belgium.

PROFESSIONAL EXPERIENCE

Hanson Dodge, Milwaukee, WI — *Interface Developer*

JUNE 2018 - PRESENT

- Responsible for collaborating with various inhouse and external backend teams and designers to deliver sites for our clients
- Collaboration with UX/Creative to streamline and document cross functional processes
- Participate in Scrum workflow (sprint planning, daily standups, retrospectives..) utilizing Jira + Bitbucket
- In collaboration with the FE lead, I implemented visual regression testing using backstop.js

TECH :: **JS** - Vanilla JS, vue.js, Gulp (40%) | **CSS** - SASS, Grid, Flexbox, Animations (40%) | **.NET** - Templating (20%)

EDUCATION

Milwaukee Area Technical College — *Associates of Interactive Media (Honors)*

JANUARY 2015 - MAY 2017

Team Treehouse Online Classes — *@iamstevenjacob*

AUGUST 2014 - AUGUST 2016

INSPIRATION

:: Hackathons :: Kikk Festival
:: Videography :: Songwriting
:: Hiking/Biking :: Travel

Byte Studios, Milwaukee, WI — *Full Stack Developer*

NOV 2015 - JUNE 2018

- Project lead through entire lifecycle to build custom, full-featured websites
- Trained clients to update content and report issues using the CMS
- Developed new and existing internal frameworks to help speed up production
- Extended CMS admin tools like on page image galleries, and event registration management
- Managed junior developers and encouraged their growth and development
- Elevated UX by utilizing google analytics event tracking

TECH :: **JS** - JQuery, Vanilla JS, vue.js (25%) | **CSS** - Flexbox, Animations (30%) | **PHP** - Templating site and CMS, Controllers backend and frontend (35%) | **MySQL** - Writing queries for backend and frontend controllers (10%)

Freelance/Open Source — Full Stack Developer

DEC 2014 - PRESENT

- Build sites that have high creative or experimental value
- Prototype and execute front end animations and transitions
- Collaborate on community focused initiatives

TECH :: **JS** - vue.js, two.js, express.js, rollup.js, axios (60%) | **CSS** - SASS, Grid, Flexbox, Animations, Transforms, Masking (30%) | **PHP** - Templating, Controllers backend and frontend (5%) | **MySQL** - Writing queries for backend and frontend controllers (5%)

HIGHLIGHT PROJECTS

Villa Terrace — Professional Website

MAY 2018

- Lead throughout the project lifecycle: discovery, inspiration, site mapping, development and site launch. Design handoff utilized Sketch/Figma for exporting assets. Concentrated efforts in the area of motion/ui development. Frontend involved: vue.js, panzoom.js, moment.js, macy.js swiper.js, and the HTML5 history API.

TECH :: JS | CSS | PHP | MySQL

Whitefish Bay Public Library — Professional Website

JANUARY 2018

- Integrated an event registration system which included: user account creation, event registration/cancellation through a 'My Events' user dashboard, automated event notifications, and new admin tools within the CMS for library staff. It was also my role to handle the project discovery (user types & user actions), wire-framing, and extending the existing design to the newly added components.

TECH :: JS | CSS | PHP | MySQL

Vue Hours — Open Source Personal Project (Work in Progress)

SEPTEMBER 2018

- Time tracking app for logging work. Component driven Vue.js app that utilizes vuex for state management. Future scope includes jira integration through an express.js microservice backend.

TECH :: JS | CSS | HTML | GIT | NPM

ScrollMotion — Open Source Personal Project

JANUARY 2018

- Small vanilla javascript library for x,y transforms while scrolling. Inspired by Relax.js, I needed a scroll animation library that waited for elements to be visible before animating. This library is currently available on github/npm.

TECH :: JS | GIT | NPM

Erinn Springer — *Photo/Video Portfolio Website*

DECEMBER 2017 - PRESENT (Support)

- Design requirements included text clipping and custom layout positioning. CMS admin tool for an on page image gallery builder. Frontend involved: jq-cliphru, jQuery, masonry.js, overlayScrollbars.js, css grid, and flexbox.

TECH :: CSS | HTML | PHP | JS | MySQL

Fuel Cafe — *Professional Website*

SEPTEMBER 2017

- Experimental design exploration to feature two restaurant locations side by side. Significant efforts in the area of motion/UI development as well as google event tracking. Frontend involved: slick.js, moment.js, split.js, flexbox, and the HTML5 History API.

TECH :: jQuery | HTML | CSS | PHP | MySQL
